PROFESSIONAL SUMMARY

Software Developer with 8 years of experience across full-stack web development and the Salesforce Platform, with the last 6+ years focused on Salesforce. I've worked across a range of projects — from building LWC components and Apex logic to configuring Experience Cloud portals and maintaining deployment pipelines. I'm comfortable talking through requirements with stakeholders and then turning those conversations into working solutions.

TECHNICAL SKILLS

Salesforce Development	SFDX	Experience Cloud	Git/Version Control
Lightning Web Components	Salesforce Integration	Community Cloud	CSS
Lightning Aura	CI/CD	Omnistudio Development	HTML5
Visualforce	Salesforce Administration	SOQL/SOSL	VueJS
Salesforce Apex	Sales Cloud	Agile Development	nodeJS
Salesforce Flows	Service Cloud	Javascript	

PROFESSIONAL EXPERIENCE

CXC Global | Salesforce Developer

September 2025 – Present

- Maintained and improved complex Salesforce Flows, including field update logic within Screen Flows, keeping automation running cleanly as business requirements evolved.
- Built "Request for Services" form templates that gave users a structured way to submit requests, cutting down on back-and-forth with the team handling intake.
- Managed deployments across environments using Copado and GitHub pipelines, keeping version control clean and releases predictable.
- Worked GitHub Copilot into my day-to-day in VS Code — used it for code generation, debugging, and PR reviews. Tried out different models (GPT-4o, Claude Sonnet) to see what worked best for different types of tasks.
- Worked closely with Project Managers and business stakeholders to gather requirements while keeping existing functionality stable and fixing bugs as they came up.

Enrite Solutions | Salesforce Developer

April 2024 – March 2025

- Maintained a shared base repository used as the starting point for all non-profit client orgs — forked it for new deployments and built out client-specific customizations from there.
- Contributed to the full development and launch of an AppExchange app with keypress auto-save across desktop and mobile, making sure it passed Salesforce's security review requirements.
- Wrote and maintained Apex Classes and Test Classes with a focus on clean structure and solid code coverage.
- Set up deployment pipelines targeting specific Scratch Orgs using Salesforce CLI and VS Code tools like Hardis.

- Connected Aura Components with Flows and Approval Processes to deliver automated user workflows without unnecessary custom code.
- Debugged UI issues using Chrome DevTools, Debug Logs, and Lightning Inspector.

OSF Digital | Salesforce Developer

July 2023 – January 2024

- Built custom LWC components, Apex Classes, and Flows for a New Zealand power company, handling third-party Opportunity and Service Point data integrations.
- Handled system configuration work including profile setup, custom object creation, and permission set assignments.
- Fixed system defects and reduced technical debt by standardizing on SLDS classes and appropriate AppExchange solutions.
- Ran requirement gathering sessions with the client and translated what came out of them into technical specs and R&D tasks.

Capgemini | Senior Consultant

February 2023 – July 2023

- Developed LWC components for Salesforce Experience Cloud portals serving high traffic volumes.
- Improved the user experience for credit/debit application flows, promo management tools, and DocuSign integrations.
- Handled platform configuration work tailored to client business rules and security requirements.

Capgemini | Consultant

August 2021 – February 2023

- Customized Vlocity Angular components, OmniScripts, DataRaptors, and Flex Cards to support business requirements beyond what the standard tools could handle.
- Automated business processes using Salesforce Flows and Process Builders to reduce the amount of custom code needing maintenance.
- Kept a mock API environment running (Heroku, Postman, NodeJS) for testing OmniScripts and Integration Procedures.
- Ran onboarding and knowledge transfer sessions for junior developers joining the team.

Accenture | Senior Application Development Analyst

June 2020 – August 2021

- Spearheaded UI development for a major Buy Flow web application rebranding, overhauling the user interface for a prominent American ISP client.
- Established internal coding standards utilizing LWC and SLDS CSS, resulting in a centralized and highly maintainable codebase.
- Facilitated Agile development processes by collaborating with business points of contact on solutioning, capability allocation, and user story creation.
- Conducted code reviews and provided technical guidance to development teams to ensure adherence to industry best practices.

Accenture | Application Development Analyst

December 2018 – June 2020

- Engineered reusable LWC and integrated LeafletJS with Google Places API to deliver a real-time serviceability verification tool for user addresses.
- Migrated legacy Visualforce code to modern Lightning Web Components, significantly improving application performance.
- Developed and maintained custom Apex classes, Aura components, and batch processes to automate scheduled platform features.
- Created test automation scripts using ATRS in parallel with standard Apex test classes to ensure deployment integrity.

Bluefrog Contents and Support, Inc. | Frontend Developer

June 2017 – September 2018

- Built an in-house employee portal using VueJS and Lumen PHP, enabling seamless profile customization, time-tracking, and leave filing.
- Reduced development time for Sportsbook websites by creating scalable VueJS component templates and standardizing SCSS file structures.
- Programmed interactive loading screens for a mobile casino application utilizing CSS4 animations and device gyroscope sensors.
- Collaborated with UI/UX designers to launch the official company website, ensuring a modern, responsive design.

Arkhold Innovations | Web Developer Intern

November 2016 – June 2017

- Converted web mockups into functional front-end interfaces for a hotel reservation platform built on Laravel and AngularJS.
- Improved search engine visibility for clients through a mix of on-page and off-page SEO work.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science in Information Technology**
Cebu Institute of Technology – University | 2013 – 2017
- **Salesforce Certifications:**
 - Salesforce Certified Platform Developer I
 - Salesforce Certified JavaScript Developer
 - Salesforce Certified Administrator
 - Salesforce Certified Platform App Builder
 - Salesforce Certified OmniStudio Developer
 - Salesforce Certified AI Associate
 - Vlocity Platform Developer
- **Other Certifications:**
 - Certificate of Language Ability - English Speaking (Rosetta Stone B2-C1)
